

1(a)	any two from: 1 time of day ; 2 (which) days (of week for exercise) ; 3 speed / distance, of walking / running ; 4 location / gradient / AW of, walking / running ; 5 temperature ;	2
1(b)(i)	exercise (programme) ;	1
1(b)(ii)	any three from: 1 (mean) difference in <u>systolic</u> blood pressure, increases / AW, after (the 12-week) exercise (programme) ; ora 2 (mean) difference in <u>diastolic</u> blood pressure, was, negative / a decrease, before (the 12-week) exercise (programme) and is, positive / an increase, after (the 12-week exercise programme) ; 3 <u>systolic</u>, blood pressure, increases / AW, after the walking test (before and after the 12-week exercise programme) ; ora 4 <u>diastolic</u> blood pressure, decreases / AW, after the walking test, before (the 12-week) exercise (programme) or <u>diastolic</u> blood pressure, increases / AW, after the walking test, after (the 12-week) exercise (programme) ; 5 paired data quote ;	3
1(c)(i)	0.31 ;	1

Question	Answer	Marks
1(c)(ii)	any two from: 1 to calculate (95%) confidence intervals / CI or to plot error bars ; 2 to <u>test</u>, whether the means (for the resting systolic blood pressures) are (significantly) different or to <u>test</u>, whether the, SE values / error bars / (95%) CI, overlap ; 3 to get a measure of how close the, calculated / sample / AW, mean is likely to be to the, true / actual / AW, mean ;	2
