

12 Which statements about the Michaelis–Menten constant (K_m) are correct?

- 1 The higher the K_m , the higher the enzyme affinity for the substrate.
- 2 K_m is a measure of the degree of enzyme affinity for the substrate.
- 3 K_m is defined as the substrate concentration at which the enzyme functions at half its maximum rate.

A 1, 2 and 3 **B** 1 and 2 only **C** 1 and 3 only **D** 2 and 3 only
