

Question number	Answer	Mark
2(a)	The only correct answer is D <i>A is incorrect because chromatography separates out solutes</i> <i>B is incorrect because dendrochronology studies tree rings</i> <i>C is incorrect because evolution looks at speciation</i>	(1)

Question number	Answer	Additional guidance	Mark
2(b)	An explanation that includes four of the following points: • because body <u>temperature</u> drops (with increasing time after death) (1) • (body temperature falls) as {the air temperature is low(er) / the body is no longer producing heat (from metabolism) / metabolism stops} (1) • time of death can be calculated if ambient temperature and change in body temperature known (1) • {muscle stiffens / rigor mortis} and (then) relaxes (again) (1) • stiffens because (levels of) ATP decrease (with time) (1) • {relaxes / stiffening decreases} because {bacteria / microorganisms / enzymes} {digest / breakdown} the muscle (1)	ACCEPT increases ACCEPT respiration stops NB must match change in body temperature if given ACCEPT use of calibration curve Piece together ACCEPT smaller muscles stiffen first {extent / degree} of stiffness can be used	(4)
