

Question	Marking Guidance	Mark	Comments
02.1	Quaternary Condensation/phosphorylation/redox Release/loss/formation (Aerobic) respiration;; All correct = 2 marks , 2–3 correct = 1 mark , 0–1 correct = 0 marks	2 (2 x AO1)	Accept 'elimination', 'production' for release

Question	Marking Guidance	Mark	Comments
02.2	(Catalyses the synthesis of ATP) 1. Active site <u>complementary</u> to ADP + Pi; 2. Enzyme-substrate complex forms; (Allows the movement of H ⁺ ions) 3. Channel (in membrane/protein/enzyme); 4. Allows <u>facilitated</u> diffusion of H ⁺ OR (Channel) has tertiary structure specific for (only) H ⁺ ;	4 (4 x AO2)	2. 'E-S' alone is insufficient Accept 'pore'
