

6(a)(i)	<i>idea of</i> heat transfer from artery to veins ;	1								
6(a)(ii)	<i>any one from:</i> vasodilation / description ; R capillaries / blood vessels move to skin surface behavioural response ; e.g. dive down to cooler waters before surfacing for air	1								
6(b)(i)	<i>any four from:</i> 1 concentration of insulin (relatively) constant for all groups before being fed ; 2 (<i>fasting dolphins</i>) insulin concentration very little change ; 3 (<i>fed dolphins</i>) insulin concentration increases then decreases ; 4 (<i>fed dolphins</i>) for 11 g / kg dolphins steep, increase / decrease, in insulin concentration ; 5 (<i>fed dolphins</i>) for 11 g / kg dolphins high(est) peak in insulin concentration ; 6 data quote for mp3 or mp4 with time in min ; <table border="1"><tr><td>3 kg</td><td>21 at 0 min</td><td>30 at 180 min</td><td>20 at 240 min</td></tr><tr><td>11 kg</td><td>10 at 0 min</td><td>79 at 90 min</td><td>18 at 480 min</td></tr></table>	3 kg	21 at 0 min	30 at 180 min	20 at 240 min	11 kg	10 at 0 min	79 at 90 min	18 at 480 min	4
3 kg	21 at 0 min	30 at 180 min	20 at 240 min							
11 kg	10 at 0 min	79 at 90 min	18 at 480 min							
6(b)(ii)	$\frac{79 - 10}{90}$; = 0.77 ;	2								

Question	Answer	Marks
6(c)	any three from: 1 change in a parameter ; 2 detected by receptor ; 3 coordination / described ; 4 (corrective) action taken by effector ; 5 return to, set point / norm / optimum ;	3
