

1(a)	<i>any two from:</i> 1 predation / fishing ; 2 food qualified ; e.g. competition / limited amount 3 disease ; 4 AVP ; e.g. idea that birth rate and death rate are roughly equal	2
1(b)	1 organisms have changed over time ; <i>any one from:</i> 2 ref. to natural selection / selective advantage for survival / survival of the fittest ; 3 ref. to long period of time ; 4 ref. to variation ;	2
1(c)	<i>any three from:</i> 1 as the generation time increases, the rate of evolution decreases / relationship is inversely proportional / AW ; ora 2 not linear / exponential / decreasing gradient ; 3 (longer generation time) so less, reproduction / DNA replication ; ora 4 ref. to fewer mutations ; ora 5 <i>idea of (so) less chance of evolution ; ora</i> <i>mp5 must be linked to mp3 or mp4</i>	3

Question	Answer	Marks
1(d)	any three from: 1 well adapted to their environment ; 2 environment / selection pressures, stayed, constant / stable ; ora 3 mutations qualified ; e.g. fewer / not selected for / low rate 4 AVP ; e.g. no natural predators / cannot migrate / no separation of populations (for speciation to occur)	3
