

Question	Marking Guidance	Mark	Comments
09.1	66.7;	1	
09.2	70;	1	
09.3	1. More fluid forced/filtered out of capillary/blood (due to high pressure); 2. Less return of fluid (into capillary/blood) due to pressure OR Lymph(atic) (system) cannot drain away all excess fluid;	2	1. Accept: water for fluid. 1. Must convey idea of 'more'. 1. Reject: more tissue fluid is forced out. 1. Do not credit 'more plasma forced out'. 2. Accept: water for fluid.
09.4	1. Larger lumen/volume (of blood vessels); 2. Reduces (blood) pressure (in blood vessels); 3. Less friction/resistance (in blood vessels);	2	1. Accept: more 'space' or more 'room' (in blood vessels). 1. Accept: more blood flow (in blood vessels). 1. Accept: reduces stroke volume or less blood in ventricle.
