

24 The photomicrograph shows cells in different stages of the mitotic cell cycle.

Which statements are correct?

- 1 Cell T shows metaphase.
- 2 DNA replication is occurring in cell R.
- 3 The amount of DNA in cell P is the same as the amount of DNA in cell T.
- 4 The correct order of stages in the mitotic cell cycle is shown by the labelled cells in the sequence $S \rightarrow R \rightarrow T \rightarrow P \rightarrow Q$.

A 1, 2 and 3 **B** 1, 2 and 4 **C** 1, 3 and 4 **D** 2, 3 and 4
