

1 Fig. 1.1 shows a diagram of the fluid mosaic model of the structure of the cell surface membrane.

Fig. 1.1

(a) Name the structures labelled **A**, **B** and **C** in Fig. 1.1.

A

B

C [3]

(b) Draw an arrow on Fig. 1.1 to show the movement of a molecule across the membrane into the cell by facilitated diffusion. [2]

(c) Explain how the fluidity of the membrane would change if the proportion of unsaturated fatty acids in the phospholipid bilayer increased.

(d) The R-groups of amino acids give them different properties.

Suggest how the properties of the R-groups of the amino acids at position **1** of **P** may differ from the R-groups of the amino acids at position **2**.
