

4(a)(i)	(O'ahu) 0.013 ;	1
4(a)(ii)	<i>any two from</i> 1 Hawai'i is youngest island / formed only 0.4 million years ago ; 2 less / little, time for, <i>Mecyclothorax</i> / beetles / them, to, colonise / arrive / speciate ; 3 Hawai'i has large area so, density / number of species per km ² , is low ; 4 early stage of succession / low habitat diversity ;	2
4(a)(iii)	<i>any two from</i> 1 O'ahu is further away from Maui (than Moloka'i) ; 2 fewer, <i>Mecyclothorax</i> / beetles / species, reached O'ahu ; 3 O'ahu was colonised later ; 4 less time for speciation ;	2
4(b)	<i>any four from</i> 1 <u>allopatric speciation</u> ; 2 geographical isolation / population became divided ; 3 different, mutations / alleles / gene pools, in different, <u>populations</u> ; 4 <i>ref. to</i> different selection pressures ; 5 no, gene flow / interbreeding, between populations ; 6 genetic differences accumulated ; 7 <u>natural selection</u> ; 8 <u>genetic drift</u> / <u>founder effect</u> ;	4
