

**28** The parts of the heart that control heart action are listed.

- sinoatrial node (SAN)
- atrioventricular node (AVN)
- Purkyne tissue

Which row is correct for atrial contraction and ventricular contraction?

|          | atrial contraction                         | ventricular contraction                    |
|----------|--------------------------------------------|--------------------------------------------|
| <b>A</b> | AVN produces waves of excitation           | SAN produces waves of excitation           |
| <b>B</b> | Purkyne tissue carries waves of excitation | AVN produces waves of excitation           |
| <b>C</b> | SAN and AVN produce waves of excitation    | Purkyne tissue carries waves of excitation |
| <b>D</b> | SAN produces waves of excitation           | Purkyne tissue carries waves of excitation |
