- (b) Fig. 5.1 shows features that are observed in transverse sections of the three main types of blood vessel.

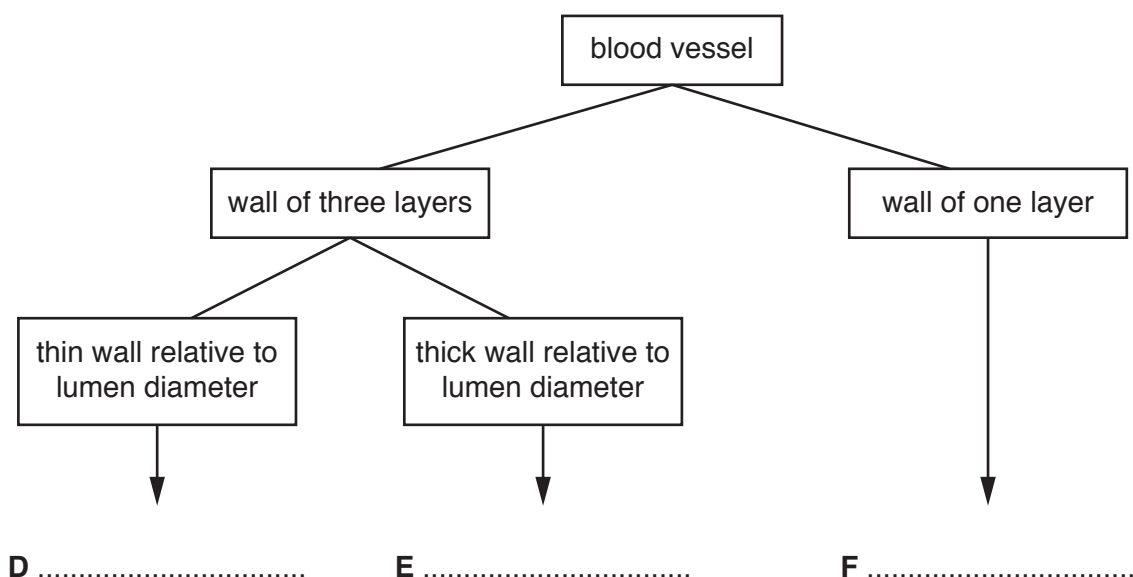

Fig. 5.1

- (i) Complete Fig. 5.1 by stating the type of blood vessel indicated by **D**, **E** and **F**. [1]

- (ii) The inner layer of the walls of **D** and **E** is composed of endothelial tissue.

List two structural features of this tissue.
