

- 2 A student used a light microscope to observe a cell and was able to distinguish between two cell structures that were 0.05 mm apart.

The student then wanted to distinguish between two other structures that were 75 μm apart with this microscope.

Which row is correct for this microscope when viewing this cell?

	term that defines the level of detail in an image	can distinguish between two cell structures 75 μm apart
A	magnification	no
B	magnification	yes
C	resolution	no
D	resolution	yes
