

1 Fig. 1.1 shows a section through the human chest. The gross structure of the human gas exchange system is shown.

Fig. 1.1

(a) Descriptions of some parts of the gas exchange system are shown in Table 1.1.

Complete Table 1.1 to:

- state the name of the part described
- write a letter from Fig. 1.1 to identify each part.

Table 1.1

| description                                                       | name of part of gas exchange system | letter from Fig. 1.1 |
|-------------------------------------------------------------------|-------------------------------------|----------------------|
| supported by incomplete (C-shaped) rings of cartilage             |                                     |                      |
| lined by ciliated epithelium and supported by blocks of cartilage |                                     |                      |
| lined by squamous epithelium                                      |                                     |                      |
| lined by ciliated epithelium, but not supported by cartilage      |                                     |                      |

**(b)** Tobacco smoke contains a number of compounds which can affect the body.

State the appropriate term that matches each of the statements **A** to **E**.

**A** The type of chemical that causes mutation of genes that control the cell cycle.

.....

**B** A component that causes a short-term increase in blood pressure.

.....

**C** A component that reduces the carrying capacity of haemoglobin for oxygen.

.....

**D** A component that increases the production and secretion of mucus from goblet cells.

.....

**E** A component that causes a short-term increase in heart rate.

.....
