

Question	Marking Guidance	Mark	Comments
09.1	Rough endoplasmic reticulum/ribosomes and Golgi (apparatus/vesicles);	1	Ignore nucleus Reject rER for rough endoplasmic reticulum.

Question	Marking Guidance	Mark	Comments
09.2	1. More red blood cells OR More haemoglobin OR More oxygen transport; 2. More (aerobic) respiration/ATP produced so exercise longer/harder OR Less lactic acid/less anaerobic respiration so exercise longer/harder;	2	

Question	Marking Guidance	Mark	Comments
09.3	1. (Human) EPO/antigen displayed on antigen-presenting cells/phagocytes/B cells (in mice); 2. (Specific) helper T cell stimulates B cell to divide/clone; 3. Plasma cells produce/release/secrete antibody;	3	

Question	Marking Guidance	Mark	Comments
09.4	1. (Anti-human EPO antibody) attaches/binds to EPO/antigen (in plastic well); 2. (Anti-mouse antibody) attaches/binds to anti-human antibody; 3. Substrate is added, enzyme causes colour change/product (is positive result);	3	2. Reject enzyme attaches/binds to anti-human EPO antibody

Question	Marking Guidance	Mark	Comments
09.5	Ethics of/welfare issues with using mice/goats/animals;	1	Reference to animals must be qualified, so ignore "use of animals"
