

29 Which statement about the pathway taken by a water molecule travelling from the soil to the xylem is correct?

- A** A water molecule in a cortex cell that takes the symplast pathway must enter the next cortex cell by passing between two adjacent phospholipid molecules in a cell surface membrane.
- B** A water molecule can pass into xylem vessels either through pits or through the cell wall of the xylem vessel elements by osmosis.
- C** A water molecule would pass into the cytoplasm of the endodermal cell if it always takes the apoplast pathway all the way to the xylem.
- D** A water molecule that has left the endodermal cells can travel by either the apoplast pathway or symplast pathway.
