

7 Descriptions of cell structures are listed.

- 1 surrounded by a single membrane and enclosing a large fluid-filled space
- 2 formed by two membranes enclosing a matrix; the inner membrane is folded
- 3 formed by a membrane that has flattened sacs and tubular structures inter-connected throughout the cell
- 4 formed of nucleic acid and protein attached to membranes or free in the cytoplasm

Which row shows the typical cells in which these cell structures are found?

	plant cell	animal cell
A	1, 2 and 3 only	1, 2 and 4 only
B	1, 2, 3 and 4	2, 3 and 4 only
C	3 and 4 only	1, 3 and 4 only
D	2, 3 and 4 only	2 and 3 only
