

- 27** The table contains some information about uptake and movement of water and of mineral ions in plants.

	water	mineral ions
mechanism for uptake	osmosis	diffusion, active transport
site of uptake	root hair cells	root hair cells
mechanism of release	evaporation, diffusion	diffusion, active transport
site of release	stomata	plant cells

Using the information provided, which factors will affect the uptake and movement of water or of mineral ions in plants?

- 1 humidity
 - 2 surface area of root hair cell
 - 3 oxygen concentration
 - 4 temperature
- A** 1, 2, 3 and 4
- B** 1, 3 and 4 only
- C** 1 and 3 only
- D** 4 only
