

Question	Marking Guidance	Mark	Comments
07.1	(No – no mark) Graph/bar chart only shows number of species, not the name of the species;	1	
07.2	(No – no mark) 1. Mutations are spontaneous/random; 2. Only the rate of mutation is affected by environment; 3. Different species do not interbreed/do not produce fertile offspring; 4. So mutation/gene/allele cannot be passed from one species to another;	4	Ignore references to correlation does not prove causation
07.3	1. Initially one/few insects with favourable mutation/allele; 2. Individuals with (favourable) mutation/allele will have more offspring; 3. Takes many generations for (favourable) mutation/allele to become the most common allele (of this gene);	3
