

- 23** The RNA codon wheel is a tool used to find which amino acid would be translated from an mRNA sequence.

Codon position 1 is in the centre of the wheel, codon position 2 is in the middle of the wheel and codon position 3 is near the edge of the wheel. The three letters on the outside edge of the wheel identify the amino acid.

The diagram shows a section of DNA coding for one amino acid. The template strand is outlined in a box and the DNA base sequence is read in the 5' to 3' direction.

Which amino acid is coded for by this section of DNA?

- A** Gly **B** Pro **C** Trp **D** Thr
