

- 10** Phosphatidylglycerol is a saturated phospholipid with an additional group $-\text{CH}_2-\text{CH}(\text{OH})-\text{CH}_2(\text{OH})$ attached to the phosphate group.

Which row correctly identifies the number of double covalent bonds at different locations in this phospholipid molecule?

	additional group	ester bonds	fatty acids
A	1	2	0
B	0	3	1
C	1	0	1
D	0	2	0
