

12 A student investigated the hydrolysis of the lipid in high-fat milk, using the enzyme lipase.

- 1 cm³ of enzyme solution was added to 10 cm³ of high-fat milk.
- The temperature was kept constant.
- The pH of the reaction mixture was recorded at time 0 minutes and every minute for 20 minutes.

Which statements could be supported by the results of the investigation?

- 1 Less product is made as time proceeds because the substrate is decreasing.
- 2 The pH of the reaction mixture changes more rapidly in the first few minutes and then changes less rapidly.
- 3 The product gradually causes more lipase molecules to denature.

A 1, 2 and 3 **B** 1 and 2 only **C** 1 and 3 only **D** 2 and 3 only
