

6(a)(i)	<i>two from:</i> glycolysis ; link reaction ; Krebs cycle ;	2
6(a)(ii)	<i>two from:</i> 1 splits H into electrons and H ⁺ ; 2 ref. to electrons along, ETC / carriers, provides energy ; 3 (energy) used to pump H ⁺ into intermembrane space ;	2

Question	Answer	Marks
6(a)(iii)	Y oxygen ; Z ATP synthase / ATP synthetase ; A stalked particle R ATPase	2
6(b)	<i>two from:</i> increase in surface area ; more, carriers / ATP synthase / ETCs ; more ATP (produced) ;	2

Question	Answer	Marks
