

- (ii) The duration of ventricular systole is the time it takes for the impulse to pass between E and F, shown on the diagram.

Calculate the proportion of time that the ventricles are contracting in one heartbeat if this heart beats 73 times per minute.

(2)

Answer

- (c) The part labelled B is in the wall of the atrium and the part labelled D is in the wall of the ventricles.

- (i) The distance between B and D is 12.5 mm.

Calculate the speed at which the impulse travels between B and D.

(1)

Answer mm s^{-1}

- (ii) Explain why this speed needs to be slower than the speeds that the impulse travels between other parts of the heart.
