

27 Which statement correctly describes an event in the process of mass flow in phloem sieve tube elements?

- A** Any part of a plant where sucrose is loaded into a sieve tube element is called a sink.
- B** Loading sucrose into a sieve tube element increases the water potential inside it.
- C** Mass flow in the phloem is a passive process occurring at the same rate as diffusion.
- D** Sucrose moves down a hydrostatic pressure gradient in the phloem from source to sink.
