

12 Which statements describe some enzyme actions?

- 1 Enzymes hold reacting molecules so that their reactive groups are close together.
- 2 In an enzyme-catalysed reaction, more molecules have sufficient energy to react than in the absence of the enzyme.
- 3 Reactions catalysed by enzymes take place at a lower temperature than they would without the enzyme.

A 1, 2 and 3 **B** 1 and 2 only **C** 1 and 3 only **D** 2 and 3 only
