

38 What is the correct sequence of events in a primary immune response?

- A** T-lymphocyte activation → B-lymphocyte selection → plasma cell release
- B** antigen presentation by macrophages → cytokines released by T-helper cells → B-lymphocyte differentiation
- C** antigen presentation by neutrophils → T-memory cell activation → B-lymphocyte selection
- D** T-memory cell activation → B-memory cell activation → antibody production
