

Question	Marking Guidance	Mark	Comments
04.1	Correct answer of 4.92, 2 marks;; If $N(N-1) = 3540$, OR $\sum n(n-1) = 720$, then award 1 mark	2	Accept 4.916/4.917/4.9
04.2	1. A method of selecting sampling sites at random; 2. Use of quadrat; 3. Identify (plant) species (at site/in each quadrat) OR Count number of (different plant) species (at site/in each quadrat);	3	1. Eg grid with coordinates selected using random number table 2. Frame or point 3. Reject refs to % cover, or counting individuals
04.3	1. Significant increase in species richness on Islay and Colonsay and (significant) fall on Harris; 2. Change in diversity on Islay not significant; 3. Greater than 0.05/5% probability of getting this change/difference by chance (on Islay) OR (For other differences) less than 0.001/0.1% probability of getting this change/difference by chance (for species richness on Colonsay, Harris, Islay) OR Less than 0.01/1% probability of getting this change/difference by chance (for diversity index on Colonsay, Harris);	3	2. Accept converse about significance of differences in other cases 3. Reject results are due/not due to chance 3. Ignore refs to P unqualified
