

- 37** Why do people with HIV/AIDS have a higher occurrence of malaria than people without HIV/AIDS?
- A** HIV/AIDS and malaria are both diseases where the pathogen travels in blood.
  - B** HIV/AIDS and malaria are both transmitted in blood.
  - C** HIV/AIDS infects T-lymphocytes which are used by the malaria pathogen.
  - D** HIV/AIDS suppresses the immune response to the malaria pathogen.
