

32 What is correct about the transport of carbon dioxide by blood?

- 1 The enzyme carbonic anhydrase catalyses the formation of carbonic acid in red blood cells.
- 2 Carbon dioxide diffuses from active cells to red blood cells and reacts with water.
- 3 Carbonic acid dissociates forming hydrogen ions that combine with haemoglobin to form carbaminohaemoglobin.

A 1, 2 and 3 **B** 1 and 2 only **C** 2 and 3 only **D** 3 only
