

25 In some cells, non-coding sequences of RNA are removed after transcription.

Which row correctly states the name of these non-coding sequences of RNA and the type of cell in which the non-coding sequences are removed?

	name of non-coding sequences	type of cell in which non-coding sequences are removed
A	exons	eukaryotic
B	exons	prokaryotic
C	introns	eukaryotic
D	introns	prokaryotic
