

29 Which statements correctly describe transport pathways in dicotyledonous plants?

- 1 In the symplast pathway, water may move through intercellular spaces.
- 2 The symplast pathway may be blocked by the tonoplast.
- 3 In the apoplast pathway, water does **not** move through plasmodesmata.
- 4 The apoplast pathway may be blocked by the Casparian strip.

A 1 and 2

B 1 and 4

C 2 and 3

D 3 and 4
