

0 2 . 1 Figure 2 shows part of a relaxed myofibril.

Figure 2

The myofibril represented in **Figure 2** has 34 sarcomeres.

The length of every sarcomere is 2 μm

After contraction of this myofibril, the length of each sarcomere changed by 20%.

Use the information provided to calculate the length of the myofibril after contraction.

Give your answer in mm and in standard form.

Show your working.

[2 marks]

Answer _____ mm
