

80 The kite diagram shows the distribution of dandelions and daisies along a transect in a field.

A quadrat with sides of 0.5 m was used to collect the data.

Each square on the vertical axis represents 1 plant. For example, in the quadrat centred at 5 m there were 6 daisies.

Which of the following statements about the data is/are correct?

- 1 Across the transect, the number of dandelions is proportional to the number of daisies.
- 2 Repeating the experiment along a different transect would result in an identical pattern.
- 3 The density of dandelions at 5 m is 36 plants per square metre.

- A** none of them
- B** 1 only
- C** 2 only
- D** 3 only
- E** 1 and 2 only
- F** 1 and 3 only
- G** 2 and 3 only
- H** 1, 2 and 3
