

15 Proteases are a group of enzymes that digest proteins.

Which statements about proteases are correct?

- 1 A bacterial protease that is secreted from a disease-causing bacterium could act as an antibody and cause the production of antigens against it.
- 2 Non-competitive inhibition of a protease that has an optimum condition of pH 2 can be overcome by increasing the substrate concentration and increasing the pH.
- 3 Water molecules are required when peptide bonds that link the monomers together are broken by the action of proteases in hydrolysis reactions.

A 1, 2 and 3 **B** 1 and 2 only **C** 2 only **D** 3 only
