

- 1 (a) Fig. 1.1 is a diagram of a part of a sarcomere in striated muscle.

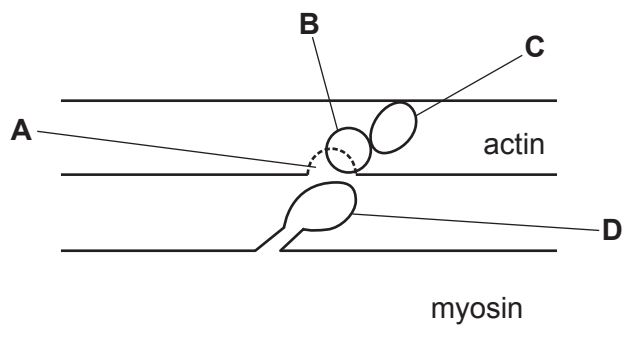

Fig. 1.1

With reference to Fig. 1.1, name **A**, **B**, **C** and **D**.

A

B

C

D

[4]

- (b)** When a muscle cell is stimulated, calcium ions are released from the sarcoplasmic reticulum.

With reference to Fig. 1.1, describe the role of calcium ions in the contraction of the sarcomere.

[4]

[4]

- (c) When a mammal dies, aerobic respiration stops. The striated muscles contract and remain contracted for a few hours after death.

Suggest why the muscles remain contracted for a few hours.
