

40 A graft of tissue, such as skin, from a different person is usually rejected by the body.

Which statement about graft rejection is correct?

- A** The graft is rejected by B-lymphocytes because they make and release antibodies which react with the surface antigens on the graft cells.
- B** The graft is rejected by B-lymphocytes because T-lymphocytes are not stimulated to produce antibodies.
- C** The graft is rejected by T-lymphocytes because the graft tissue causes T-lymphocytes to release antibodies.
- D** The graft is rejected by T-lymphocytes because they circulate in the blood and can gather at the graft site.

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (UCLES) to trace copyright holders, but if any items requiring clearance have unwittingly been included, the publisher will be pleased to make amends at the earliest possible opportunity.

To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced online in the Cambridge Assessment International Education Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download at www.cambridgeinternational.org after the live examination series.

Cambridge Assessment International Education is part of the Cambridge Assessment Group. Cambridge Assessment is the brand name of the University of Cambridge Local Examinations Syndicate (UCLES), which itself is a department of the University of Cambridge.
