

0 5 . 1

The action of endopeptidases and exopeptidases can increase the rate of protein digestion. Describe how.

[2 marks]

0 5 . 2

As humans age, there is a decrease in body protein.

Give the name of **one** body protein that could have resulted in:

[2 marks]

reduced muscle power _____

reduced immunity _____

Scientists investigated the effect of two types of dietary protein on the ability of old men to produce body proteins.

Table 2 shows information about the two types of dietary protein investigated.

Table 2

Physiological factor	Name of dietary protein	
	Casein	Whey
Rate of absorption of dietary protein / mmol dm^{-3} amino acids in blood plasma h^{-1}	3.05	4.33
Stimulation of protein synthesis	Higher rate	Lower rate
Breakdown of body proteins	No effect	Inhibitory effect

Protein Type	Percentage of protein absorbed that becomes body protein
Casein	~72%
Whey	~78%
