

Woodlice are small invertebrate animals. Fig. 2.1 shows a single woodlouse.

Fig. 2.1

Fig. 2.2 shows a simple respirometer.

Fig. 2.2

- (a)** Explain how the experimental set-up in Fig. 2.2 allows the rate of respiration of woodlice to be determined.

- (b) A student determined the rate of respiration of woodlice at a temperature of 5°C and at a temperature of 20°C.

Predict **and** explain how the rate of respiration of woodlice differs at 5°C compared to 20°C.
