

- 9** The masses of the parts of haemoglobin are shown in the table.

| component              | mass/Da |
|------------------------|---------|
| $\alpha$ -globin chain | 15 126  |
| $\beta$ -globin chain  | 15 868  |
| haem group             | 617     |

There are 1000 Da in 1 kDa.

What is the mass of a haemoglobin molecule in kDa?

- A** 31.6                      **B** 33.5                      **C** 62.6                      **D** 64.5
