

1(a)	<table><tr><th>feature</th><th>letter</th></tr><tr><td>glomerular filtrate</td><td>E ;</td></tr><tr><td>basement membrane</td><td>C ;</td></tr><tr><td>podocyte cells</td><td>D ;</td></tr><tr><td>capillary endothelial cell</td><td>A ;</td></tr></table>	feature	letter	glomerular filtrate	E ;	basement membrane	C ;	podocyte cells	D ;	capillary endothelial cell	A ;	4
feature	letter											
glomerular filtrate	E ;											
basement membrane	C ;											
podocyte cells	D ;											
capillary endothelial cell	A ;											
1(b)	any five from: 1 afferent arteriole, (lumen) wider / has larger diameter, than efferent ; 2 causes high, blood / hydrostatic, pressure in, glomerulus / capillaries ; 3 pores / gaps / fenestrations, in capillary endothelium ; I holes in cells 4 basement membrane acts as a filter / AW ; 5 detail of podocytes ; e.g. finger-like structures / folds / slit pores 6 correct <i>ref. to</i> passage of substances ; e.g. basement membrane stops, blood cells / large proteins / molecules above RMM 68 000–70 000 or allows urea / glucose / amino acids / ions / water 7 <i>idea of</i> network of capillaries ;	5										
1(c)(i)	any two from: 1 as (mean arterial blood) pressure increases the GFR increases, levels off and increases / AW ; 2 (plateau occurs) at 100 cm³ min⁻¹ / between 10 and 20 kPa ; 3 AVP ; e.g. plateau is normal or healthy value	2										

Question	Answer	Marks
1(c)(ii)	<i>any one from:</i> 1 kidney, damage / disease / cancer ; 2 dehydration ; 3 low, blood / hydrostatic, pressure or blood loss ; 4 AVP ; e.g. other (relevant) disease	1
