

33 The diagram shows the pathway for the transport of carbon dioxide that occurs in red blood cells.

Which row is correct?

	1	2	3	4
A	carbonic anhydrase	carbonic acid	hydrogen ions	hydrogencarbonate ions
B	carbaminohaemoglobin	haemoglobinic acid	hydrogen ions	hydrogencarbonate ions
C	carbaminohaemoglobin	carbonic anhydrase	carbonic acid	carbon dioxide
D	haemoglobinic acid	carbonic acid	hydrogencarbonate ions	hydrogen ions
