

Question	Marking Guidance	Mark	Comments
04.1	1. Membrane more permeable to potassium ions and less permeable to sodium ions; 2. Sodium ions actively transported/pumped out and potassium ions in;	2	
04.2	1. (Pressure causes) membrane/lamellae to become deformed/stretched; 2. Sodium ion channels in membrane open and sodium ions move in; 3. Greater pressure more channels open/sodium ions enter;	3	
04.3	1. Threshold has been reached; 2. (Threshold or above) causes maximal response / all or nothing principle;	2	
04.4	1. Less/no saltatory conduction / action potential/impulse unable to 'jump' from node to node; 2. More depolarisation over length/area of membranes;	2
