

- 30** The diagram shows the effect of three different concentrations of carbon dioxide on the oxygen dissociation curve for human haemoglobin.

What effect does increasing carbon dioxide concentration have on haemoglobin?

- A** It makes it less efficient at taking up oxygen and less efficient at releasing it.
- B** It makes it less efficient at taking up oxygen and more efficient at releasing it.
- C** It makes it more efficient at taking up oxygen and less efficient at releasing it.
- D** It makes it more efficient at taking up oxygen and more efficient at releasing it.
