

Question Number	Answer	Mark
4(a)(i)	The only correct answer is B formation of microtubules <i>A is not correct because the centriole is not involved in lysosome formation</i> <i>C is not correct because the centriole is not involved in RNA formation</i> <i>D is not correct because the centriole is not involved in vesicle formation</i>	(1)

Question Number	Answer	Additional guidance	Mark
4(a)(ii)	viewed from a different angle / one was transverse and one is longitudinal when the cell was {sliced / cut} (1)		(1)

Question Number	Answer	Additional guidance	Mark
4(b)(i)	An answer that makes reference to the following points: • 4 pairs of chromosomes each joined at centromere (1) • lined up vertically on equator (1) • spindle fibres and centrioles shown (1)	<u>Example of diagram</u> 	(3)

Question Number	Answer	Additional guidance	Mark
4(b)(ii)	A description that makes reference to two of the following points: • centromere {splits / divides} (1) • {spindle fibres / microtubules} contract (1) • one copy of each chromosome pulled to {poles / sides} of cell (1)	ACCEPT on a diagram ACCEPT the chromosomes {are separated / pulled apart / move apart}	(2)

Question Number	Answer	Additional guidance	Mark
4(c)	6 / six (hours)	REJECT answers given as fractions	(1)

Question Number	Answer	Additional guidance	Mark
4(d)	the number of cells in mitosis divided by the total number of cells ($\times 100$)	ACCEPT correct equation IGNORE cells with visible chromosomes / dividing cells	(1)
