

7(a)(i)	thylakoid (membranes) / lamellae / granum / grana ;	1
7(a)(ii)	A <u>photolysis</u> (of water) ; B chemiosmosis / (cyclic) photophosphorylation ;	2
7(a)(iii)	<i>any one of:</i> diffuses out / lost / expelled / released, from, leaf / stomata / plant ; used in, (aerobic) respiration / oxidative phosphorylation ;	1
7(a)(iv)	<u>chlorophyll a</u> ;	1
7(a)(v)	<u>ATP</u> and reduced <u>NADP</u> / <u>NADPH</u> ;	1
7(b)	<i>any three from:</i> regenerate / produce / make/ form, RuBP ; (triose phosphate / glucose / acetyl coA) for respiration ; to make any two of: glucose / sucrose / ribose / deoxyribose / glycerol / acetyl (coA) / fatty acids / amino acids starch / cellulose ; ;	3
