

Question Number	Answer	Additional guidance	Mark
2(a)(i)	An answer that includes the following point: correct number of chromosomes for both (1)		(1)

Question Number	Answer	Additional guidance	Mark
2(a)(ii)	An answer that includes the following point: correct label (1)		(1)

Question Number	Answer	Mark
2(b)(i)	The only correct answer is A P <i>B is not correct because Q is an anther</i> <i>C is not correct because it is a polar nucleus</i> <i>D is not correct because T is an egg cell</i>	(1)

Question Number	Answer	Mark
2(b)(ii)	The only correct answer is C T <i>A is not correct because that is the ovule</i> <i>B is not correct because it is the polar nucleus</i> <i>D is not correct because it is a male nucleus</i>	(1)

Question Number	Answer	Mark
2(b)(iii)	The only correct answer is D U <i>A is not correct because they are pollen grains</i> <i>B is not correct because they are the polar nucleus</i> <i>C is not correct because it is an egg cell</i>	(1)

Question Number	Answer	Mark
2(b)(iv)	The only correct answer is B S <i>A is not correct because it is a pollen grain</i> <i>C is not correct because it is an egg cell</i> <i>D is not correct because it is a male nucleus</i>	(1)

Question Number	Answer	Additional guidance	Mark
2(b)(v)	A description that includes two of the following points: - controls the growth of the pollen tube (1) - contains the genes to make {digestive / hydrolytic} enzymes (1) (which allows) the male {nucleus / nuclei / gamete(s)} to {enter ovule / enter ovary / enter egg cell / fertilise the egg cell / fertilise the polar nuclei / fertilise female gametes} (1)	accept {forms / makes} pollen tube ignore forms a tube accept {produce / make / secrete / uses} {digestive / hydrolytic} enzymes ignore tube nucleus fusing / fertilising	(2)
