

12 The effect of substrate concentration on an enzyme-catalysed reaction was measured in three different conditions:

- with no inhibitor
- with inhibitor X
- with inhibitor Y.

The graph shows the results.

Which statement is correct?

- A** X is a competitive inhibitor which binds away from the active site of the enzyme.
- B** X is a non-competitive inhibitor which has a similar shape to the substrate.
- C** Y is a competitive inhibitor which has a similar shape to the substrate.
- D** Y is a non-competitive inhibitor which binds away from the active site of the enzyme.
