

- 15** Blocks of agar are stained with a pH indicator and used to investigate the diffusion of an acid solution.

Which block would completely change colour the fastest?

- A** $1\text{ mm} \times 1\text{ mm} \times 1\text{ mm}$
- B** $1\text{ mm} \times 0.25\text{ mm} \times 0.25\text{ mm}$
- C** $1\text{ mm} \times 0.5\text{ mm} \times 0.5\text{ mm}$
- D** $2\text{ mm} \times 0.5\text{ mm} \times 0.5\text{ mm}$
