

6(a)(i)	(cytoplasm of) presynaptic / terminal, knob ; <u>presynaptic membrane</u> ; <u>presynaptic membrane</u> ; <u>postsynaptic membrane</u> ;	4
6(a)(ii)	any two from: one-way / unidirectional (transmission of impulses) ; communication between (many) neurones ; AVP ;	2
6(b)	any four from: 1 binds to / inhibits, <u>acetylcholinesterase</u> ; 2 active site, blocked / shape changes ; 3 Ach / acetylcholinesterase, not broken down / stays bound to receptors ; 4 Na ⁺ channels stay open ; 5 sarcolemma, (stays) depolarised / has constant action potentials ; 6 muscles stay contracted ;	4
6(c)	any two from: 1 Ca ²⁺ channels open ; 2 Ca ²⁺ , diffuses / released, into sarcoplasm ; 3 Ca ²⁺ binds to troponin ; 4 tropomyosin, moves / changes position ; 5 cross-bridges form / myosin binds to actin ;	2
